Forensic

Name:

F1: Passport

Message:

Description:

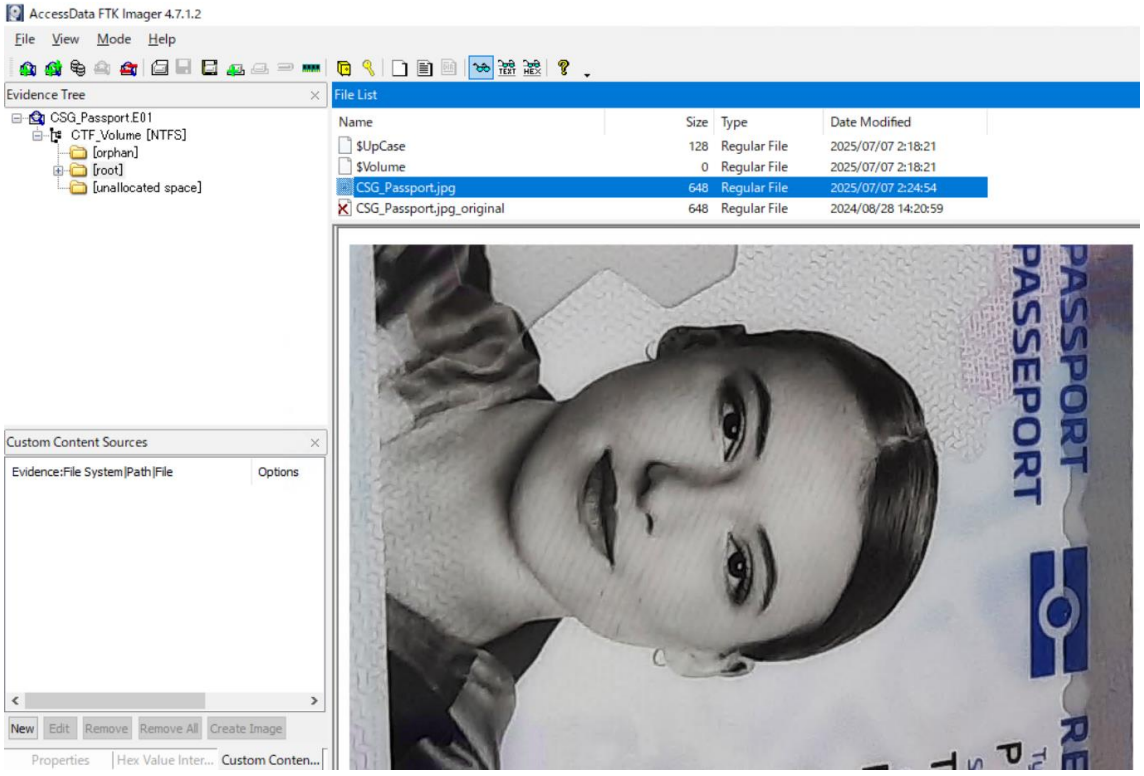

I was in a rush and somehow lost my passport at the airport. When I asked for help, the airport staff handed me a strange file. They said everything I need is inside, but I have no idea how to access it! Can you help me recover my passport data?

Details:

Your task is to perform forensic analysis on the provided E01 file. Use forensic tools to extract the data and recover a photo of the passport. The flag is hidden within the metadata of this photo.

Instructions:

The file is in E01 format. Use FTK Imager to open it, then navigate through the MFT and root directory to retrieve the data.

Use Exif Tool to get the flag from metadata
