MISC

Name:

Hallucination in another world

Message:

You are provided with a CSV containing a list of domains with empty cells.
Your task is to fill in all the empty cells and submit the completed sheet to the server to obtain the flag.
The CSV is available from: https://o5ey6dthcg.execute-api.ap-southeast-1.amazonaws.com/upload-report

Although you can complete this task manually, it is time-consuming.
Therefore, in this challenge, you are allowed to use a generative AI service of your choice.
However, please be aware that current generative AI technologies can produce hallucinations.
Hallucinations are more likely to occur if the AI model is unfamiliar with the content, for example, content in the Japanese language.

Instruction:
- Follow the format in the report template. Do not add or remove any rows or columns.
- "Prefecture" must be expressed in English. "Telephone" numbers must be formatted as <digits>-<digits>-<digits> without the country code (e.g., 03-4330-7600).
- Ensure that there are no spaces in the data. The checker verifies the data by exact match.
- Do not alter the order of the domains. The checker program will return "NG" if the order is broken.

Note) This is not a pwn challenge. Do not try to test any vulnerability of the checker program.

Instructions:

You are allowed to use any generative AI services for help.
In this example we use Microsoft Copilot.

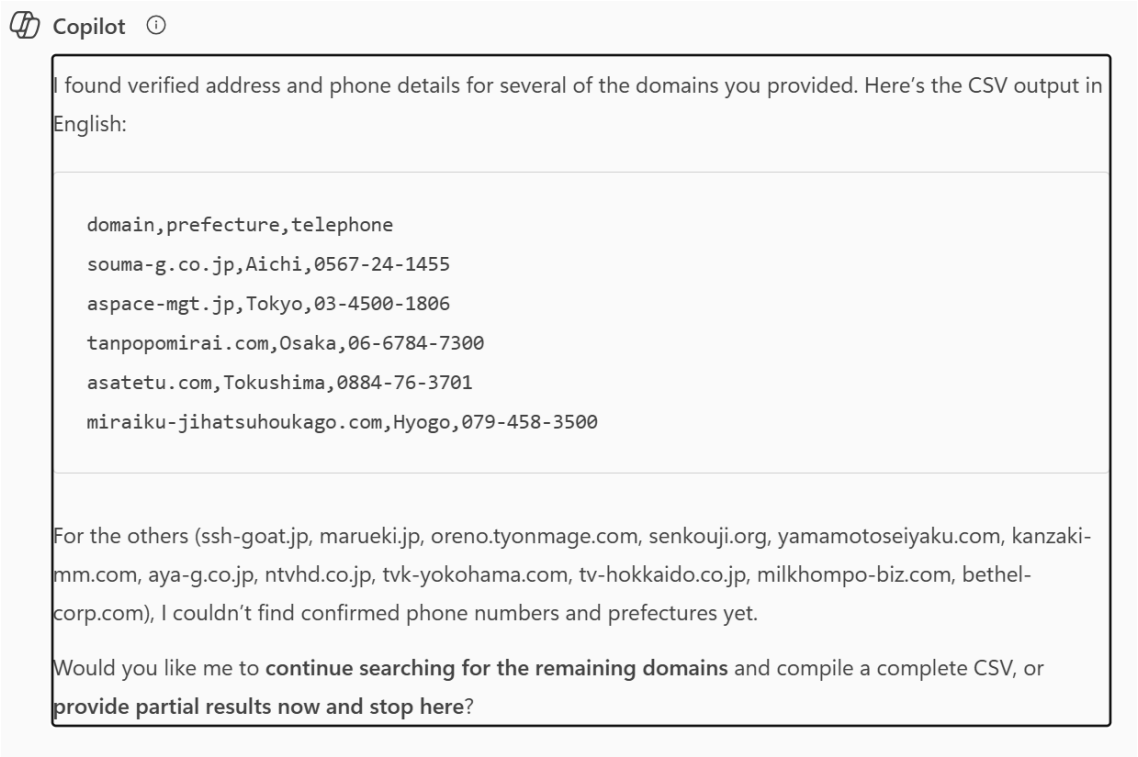

Used prompt is as follows.

[INSTRUCTION]
Please identify Japanese prefecture and telephone number of the following domains.

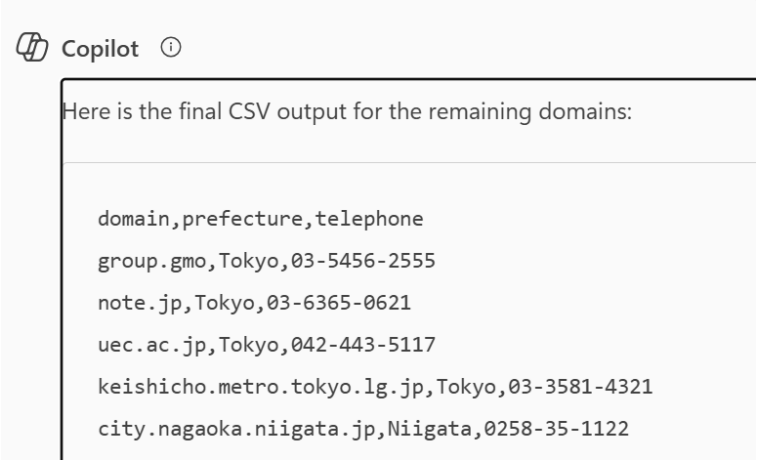

[EXPECTED OUTPUT]
Output should be CSV of domain, prefecture and telephone number.
All output must be English. Example: trendmicro.co.jp,Tokyo,03-4330-7600

[INPUT]
souma-g.co.jp marueki.jp aspace-mgt.jp tanpopomirai.com asatetu.com oreno.tyonmage.com senkouji.org yamamotoseiyaku.com miraiku-jihatsuhoukago.com kanzaki-mm.com aya-g.co.jp ntvhd.co.jp tvk-yokohama.com tv-hokkaido.co.jp milkhompo-biz.com bethel-corp.com ksdh.or.jp kdh.or.jp group.gmo note.jp uec.ac.jp keishicho.metro.tokyo.lg.jp city.nagaoka.niigata.jp interconti-tokyo.com t-doitsumura.co.jp kotoura-umaimonya.com imabari-shimanami.jp takinomiya.com
---

First we get partial results. It did not answer for all domains.

Continue with some corrections and get the final (submittable) result.

Submit it and we get the checker's result. It says there are NGs. So we need to check more…

Domain	Prefecture	HQ Telephone	result
trendmicro.co.jp	Tokyo	03-4330-7600	OK
souma-g.co.jp	Aichi	0567-24-0625	NG
ssh-goat.jp	NaN	NaN	NG
marueki.jp	Shizuoka	0537-35-2300	NG
aspace-mgt.jp	Tokyo	03-4500-1806	OK
tanpopomirai.com	Osaka	06-6784-7300	OK
asatetu.com	Tokushima	0884-76-3701	OK
oreno.tyonmage.com	Osaka	06-4708-5900	NG
senkouji.org	Hiroshima	0848-23-2310	NG
yamamotoseiyaku.com	Aichi	0568-77-2211	NG
miraiku-jihatsuhoukago.com	Hyogo	079-458-3500	OK
kanzaki-mm.com	Hyogo	06-6491-1111	NG
aya-g.co.jp	Saitama	048-662-5522	OK
ntvhd.co.jp	Tokyo	03-6215-4111	OK
tvk-yokohama.com	Kanagawa	045-651-1711	OK
tv-hokkaido.co.jp	Hokkaido	011-232-1117	OK
milkhompo-biz.com	Osaka	0120-349-369	NG
bethel-corp.com	NaN	NaN	NG
ksdh.or.jp	Osaka	06-7507-2260	OK
kdh.or.jp	Tokyo	03-5606-0201	NG

After ask AI more and verify the result manually we get the final result. You must use translator if you cannot read Japanese. If you are AI expert, you can create the correct answer with AI only…?
