O1: Japanese geography

Message:

Q1:

There are four types of prefectures in Japan: "To" (metropolitan), "Do" (provincial), Fu (prefectural), and "Ken" (prefecture), but the majority of prefectures are classified as “Ken”. Select all prefectures except “Ken”s from the map of Japan.

Q2:

Select all prefectures without universities named after the prefecture from the map of Japan.

Q3:

Select all prefectures without natural lakes from the map of Japan.

Notes: Lakes do not include swamps, ponds and mudflats.

Q4:

Select all prefectures without Shinkansen stations from the map of Japan.

Instructions:

Q1:

You can see all the prefectures on this map:

https://cyberseagame2025.s3.us-east-2.amazonaws.com/japan-map/Answer/Kens.html

Q2:

This map is a collection of links to the websites of universities bearing the names of their respective prefectures.

https://cyberseagame2025.s3.us-east-2.amazonaws.com/japan-map/Answer/Universities.html

There is no “Tochigi-University” in Tochigi.

Q3:

This map is a collection of links to tourist sites related to lakes in each prefecture.

https://cyberseagame2025.s3.us-east-2.amazonaws.com/japan-map/Answer/Natural-Lakes.html

Prefectures without natural “lakes”, “swamps”, “ponds”, or "mud flats”:

Iwate, Mie, Wakayama, Nara, Osaka, Hyogo, Okayama, Hiroshima, Yamaguchi, Kagawa, Ehime, Kochi, Fukuoka, Saga and Nagasaki

Prefectures without natural “lakes”:

Saitama: While there are numerous natural swamps in Saitama Prefecture, there are no natural lakes.

Okinawa: The natural “manko” exists. Although man-“ko” is a Japanese name that refers to a lake, the reality of “manko” is a tidal flat.

Tokyo, Toyama, Aichi, Tokushima and Miyazaki: While natural swamps or ponds exist in these prefectures, there are no natural lakes.

Q4:

Here is a map of the all of Shinkansen-lines.
